EDUCATION

Northumbria University, MSc. Advanced Computer Science (Distinction)

September 2024 – September 2025

- **Courses:** Advanced Programming, Big Data & Cloud Computing, Machine Learning, Wireless Networking & Security
- **Programme Rep:** Representing students in academic and strategic discussions with faculty.

Institute of Business Administration (IBA), BSc. Computer Science (CGPA 3.79/4.00)

August 2018 – May 2022

- **Courses:** OOP, Data Structures, Algorithms, Databases, Operating Systems, Artificial Intelligence, Business Intelligence
- **Dean's List (2018-2022):** Recognized for academic excellence, maintaining a CGPA of 3.5+ throughout the program.

PROFESSIONAL EXPERIENCE

GoodCore Software Limited – *Software Engineer*

June 2022 – September 2024

- Developed and maintained scalable web-based applications across the full stack (PHP, React, PostgreSQL).
- Migrated legacy systems to Laravel 10 and PHP 8.2, improving performance for their flagship project – BriefingSource.
- Worked on the front-end to implement responsive, intuitive UI/UXs using HTML5, CSS3, JavaScript and TypeScript (React).
- Integrated Google APIs (Calendar, Drive, Sheets) and external services to support dynamic, data-driven workflows.
- Designed APIs and CRON jobs to maintain GDPR compliance, reducing compliance-related incidents by 50%.
- Made use of queues to handle the bulk mailing feature to improve efficiency by processing 1000+ emails per day.
- Built and maintained CI/CD pipelines using Bitbucket, enhancing deployment speed by 30%.
- Setup a zero-dependency development environment using Docker, while also managing DevOps using Linux.
- Decoupled specific workloads e.g. image compression into lightweight Node.js/Express services, reducing bottlenecks.
- Promoted a more test friendly workflow, writing unit and integration tests on the backend (PHPUnit) and frontend (Jest).
- Mentored and onboarded new members, ensuring seamless onboarding (3 out of 3 developers successfully integrated).
- Participated in daily stand-ups, sprint reviews, and planning meetings with designers, engineers, and stakeholders.
- Crafted technical documentation e.g. API docs, user guides, developer guides to support system processes.
- Delivered a company-wide tech talk on Gen-AI, exploring ethical implications and use cases in enterprise tools.

Institute of Business Administration – *Teaching Assistant (Operating Systems)*

September 2021 – December 2021

- Conducted engaging tutorials to reinforce key operating system concepts and enhance student understanding.
- Provided one-on-one assistance to students on assignments and projects, fostering a supportive learning environment.

Habib Bank Limited (HBL) – *Software Engineering Intern*

July 2021 – September 2021

- Drafted an intuitive Android UI/UX for the Asset Evaluation System (AES), enhancing usability for the valuation team.

Supersoft Corporation – *Data Science Intern*

March 2021 – May 2021

- Created impactful data visualisations for client datasets using Python and KNIME, driving informed decision-making.
- Wrote SQL scripts to extract actionable insights and streamline workflows across 50+ tables.
- Developed interactive Power BI dashboards to visualize key metrics and support strategic decision-making.

PROJECTS

- **Word Matrix:** A wordle inspired daily game built with Typescript and Next.js.
- **AquaSync:** Dashboard showing potential water savings from rainwater harvesting built using React, TypeScript and Vite.
- **Hijri Applet:** A Linux Mint desktop panel applet that displays the current Hijri (Islamic) date
- **Smart Cities:** Dockerized Spring Boot microservices-based application responsible for electricity management.
- **Venue Portal:** A MERN stack application for finding event venues. AWS S3 for storage, Google Cloud for Map integration.

SKILLS

- **Languages:** JavaScript, TypeScript, PHP, Java, Python, Go, C++, SQL, HTML5, CSS3
- **Technologies:** Git, GitHub, Docker, Laravel, Spring, Spring Boot, React.js, Node.js, PostgreSQL, MySQL, Oracle RDBMS, AI/ML
- **Cloud & DevOps:** CI/CD (Bitbucket Pipelines, GitHub Actions), Semantic Versioning, AWS S3
- **Testing & Quality:** Jest, Playwright, PHPUnit, PHPStan, Code Reviews, Pair Programming, TDD
- **Practices:** Agile (Scrum), Documentation, Mentorship, SDLC, Security & Compliance
